## Company Recruitment Team

December 5, 2018

WALMART INC.

### Job Application for Director Software Engineering

Dear Manager,

### About Me

---

I am employed at Capital One in Northern Virginia as a Sr. Manager Software Engineering. I have led several teams across the organization. Have strong experience in API development, using AWS Cloud, employing Agile methodology. I have built DevOps teams. I have built highly secure and resilient systems. With more knowledge on the posted job role, I will be able to engage in a deeper discussion.

### Why Walmart?

---

Recent tie up between Walmart and Capital One, has brought to my attention that Walmart is aiming to go even deeper in leveraging state of the art technology. I am looking for growth and eager to contribute to the vision and growth of Walmart.

### Why Me?

---

I have the very strong hands-on experience of building DevOps teams of over 30 associates. I have seen success in empowering and facilitating associates to give their best and bring innovation by looking for open source opportunities. I have mentoring and raised the bar in software delivery in all lines of business that I have worked. I have very strong experience in building well architect-ed systems. I would like to know more about this opportunity.

Sincerely,

**Sarojkumar "SK" B.Tondwalkar**
